

September, 2019- HealthPRO Awards IOS 5-Year Contract for CompoundingQMS™ and Third Party NAPRA Certified Training

HealthPRO has awarded a 5- year contract to Innovative OncoSolutions Inc. for our CompoundingQMS™ quality management system and Third Party NAPRA Certified Training. Members of the HealthPRO buying group can now procure these systems and services without going to RFP.

HealthPRO has been evaluating extensively a Quality Management System to automate and enhance the current manual recording of Pharmacy information including personnel training, quality assurance and NAPRA compliance management. CompoundingQMS™ fully complies to all the requirements of NAPRA Model Standards for Pharmacy Compounding of non-hazardous and hazardous sterile and non-sterile preparations, including integration with multiple users at multiple customer sites.

CompoundingQMS™ automates these standards:

- CompoundingQMS™ measures compliance of all compounding personnel, cleaning and disinfecting personnel and equipment
- Automates and monitors anniversary dates for quality assurance of all compounding personnel, cleaning and disinfecting personnel and equipment per NAPRA standards
- Includes a central repository to host policies and procedures, general maintenance logs environmental testing documentation and quality assurance per NAPRA compounding standards.

CompoundingQMS™ can easily expand as needed to accommodate new users and implementation is easy and straightforward. Whether it be self-audits, environmental monitoring and competency tracking for USP Chapters 797/ 800 and NAPRA,

detection and prevention of drug diversion, tracking URAC compliance or ensuring safe and proper medication storage – clients can implement and start using CompoundingQMS™ quickly and easily. No IT integration or support is required.

One of the key elements of this contract is the awarding of third party NAPRA compliance training for Pharmacy staff. HealthPRO members can now obtain certification and recertification training directly from IOS. We provide third party certifications services on your site to maximize certification techniques with your actual workflow. We offer a Master Class Two- Day Certification Course in Aseptic Training Techniques based on NAPRA Standards. Participants will receive didactic and live aseptic technique training and coaching based on the preparation of low and medium risk sterile compounded products, followed by testing which includes media fill for low and medium risk level CSPs, gloved finger tip sampling, and surfaces sampling (there is also high risk level media fill testing). We also offer a Recertification Course. This is offered to people who have at some time completed the Master Class. In this one-day session, participants will be presented with an emerging issue in pharmacy compounding followed by a refresher of aseptic techniques, media fill testing, gloves finger tip testing, and surface sampling.

We are already a Vendor-Of-Record for HealthPRO's Closed System Transfer Devices (CSTDs) and over 40 hospitals and institutions have standardized on our EQUASHIELD CSTDs. In addition to safety, using a CSTD can significantly offset drug wastage costs. With this additional contract, we are proud to be able to offer our CompoundingQMS™ and Third Party NAPRA Certified Training to HealthPRO members without them having to spend time and effort in an extensive RFP process.

We will continue to work with HealthPRO on our NAPRA certified QleanSpace™ Modular Cleanroom offering to fully assist clients in delivering the best NAPRA Model Standards in the preparation and compounding of sterile preparations. QleanSpace™ fully meets the highest quality standards in order to ensure preparation quality and safety.

Our goal is to provide a safe and reliable environment for clinicians and patients in the preparation and administration of hazardous and non-hazardous drugs.
