# Aseptic Training Techniques

IOS provides third party certifications services on your site to maximize certification techniques with your actual workflow.

---

## Aseptic Technique Training and Certification

---

## Master Class Two Day Certification Course in Aseptic Techniques based on NAPRA Standards.

### Two Day Master Class

The two day Master Class will consist of a series of presentations and live aseptic technique training and coaching for the preparation of low and medium risk sterile compounded products. A media fill test with Gloved Finger Tip Sampling (GFS) and Surface Sampling (SS) will be conducted after completion of the training.

Upon completion the participant will receive a package which will include: Documentation with results for media fill, GFS and SS and a Certificate of Successful Course Completion.

---

## One Day Recertification.

### Recertification Class

Recertification is a one day refresher session which will include a presentation on an emerging or current pharmacy compounding issue, followed by a short review of aseptic techniques before commencing a media fill testing, GFS and SS.

Upon successful completion the participant will receive a package including documentation and results of their Gloved Finger Tip Sampling and Surface Sampling along with a Certificate of Completion. Eligible participants must have completed the Master Class prior to recertification.

## About Us

Innovative OncoSolutions (IOS) is a Canadian pharma-oncology provider of safe and cost-effective clean room environments and closed system transfer devices (CSTDs) to the Canadian healthcare market. We also offer the most advanced web-based NAPRA compliant quality management system providing a comprehensive electronic audit and quality assurance system. Our third party certification services in aseptic training techniques are conducted on your site for maximum benefit.

Our goal is to provide a safe and reliable environment for clinicians and patients in the preparation and administration of hazardous and non-hazardous drugs.
